**WEEE Directive 2002/96/EC Compliance Statement**

Many of our consumers have inquired about our commitment and responsibility as an electronic manufacturer. In compliance with the WEEE Directive 2002/96/EC, Raymar – Telenetics has developed a recycling program.

Raymar-Telenetics is committed to encouraging consumers to recycle unused and end of life electronics in a responsible manner. The recycling program will allow for consumers to return all unwanted, obsolete and/or damaged electronic products to its facility. To obtain more information about all products covered by this program, consumers may go to the following website: <http://www.raymarinc.com>. Detail instructions on the return of Raymar-Telenetics will be provided to each consumer individually.

Sincerely,

A handwritten signature in black ink that reads "Portellas".

Gary Portellas  
Director of Engineering &  
Product Manufacturing
