

Statement of RoHS Exemption

In the Directive 2002/95/EC of the European Parliament and of the Council of 27 January 2003, Article 5 (b) states:

“Any amendments which are necessary in order to adapt the Annex to scientific and technical progress for the following purposes shall be adopted in accordance with the procedure referred to in Article 7(2):

- (b) exempting materials and components of electrical and electronic equipment from Article 4(1) if their elimination or substitution via design changes or materials and components which do not require any of the materials or substances referred to therein is technically or scientifically impracticable, or where the negative environmental, health and/or consumer safety impacts caused by substitution are likely to outweigh the environmental, health and/or consumer safety benefits thereof;”

Also, identified in the Annex of the Directive 2002/95/EC, under item number 7, lead in solders for network infrastructure equipment for switching, signaling, transmission as well as network management for telecommunication, is exempted from the requirements of Article 4(1).

According to the United States Department of Commerce and Directive 2002/95/EC, exemptions are granted for specific applications and not products. Hence, if the user uses the substance in the specific application exempted from RoHS, they can benefit from the specified exemption.

For the purposes as stated in the Directive 2002/95/EC, Article 7(2), the products supplied by Raymar-Telenetics are exempted from RoHS compliance. For further details and questions, please contact Raymar-Telenetics.

Sincerely,

A handwritten signature in black ink that reads "G. Portellas".
